

## Sealer Use Chart

### Which Stone to Use Sealers On?

Knowing which natural stone or engineered stone surfaces are compatible with the various [topical sealers](#) and [impregnating sealers](#) can be challenging. As a result, Tenax has put together a chart showing the compatibility between Tenax products and various stone materials. The chart below offers star ratings for compatibility between a material and a sealer. For more information regarding these you can check out our article discussing the [best granite sealers](#)
